

OCCUPATIONAL HEALTH AND SAFETY

ConvaTech is committed to the provision and maintenance of a healthy and safe work place for all employees, subcontractors and visitors.

Safety is fundamental to the operation of our activities and ranks equally with sales and profitability.

Health and safety is also of critical importance to our customers' sites. These sites have in place detailed OH&S procedures that have been developed in recognition of the specific risk elements of the sites' operations.

ConvaTech will comply with OH&S legislation and all other relevant Codes of Practice and Standards to facilitate the prevention of injury or illness arising from unsafe practices and hazards in the workplace.

The participation of employees in all OH&S matters will be encouraged by Occupational Health and Safety Consultation process required by legislation and agreed to by employees and management.

ConvaTech will ensure all employees are informed of and understand their accountability for their areas of responsibility.

ConvaTech will ensure that all employees are familiar with the ConvaTech Occupational Health and Safety Management System, and that no employees will be engaged to work on any site until the employee has undertaken the induction, which is specific to the site.

ConvaTech is committed to a Best Practice approach for Occupational Health, Safety and Rehabilitation programs as an integral part of total quality management philosophy. This also includes revision of the Occupational Health and Safety Management System at regular intervals.
