

▀ BELT CLEANER SUPERPOLE

The range of ConvaTech belt cleaners are guaranteed to reduce carry back, safety hazards and environmental impact along the conveyor.

To overcome vibration and flex within standard belt cleaner poles on high speed or wide conveyor belts, TS Global has developed our superpole which is proven to combat these issues. The superpole provides a more evenly distributed tip pressure across the belt to increase performance.

Before

After

Our superpole can be incorporated into our complete range of belt cleaners and contributes to the reduction of wear and premature failure of conveyor belt, return rollers, wear to pulley lagging, minimise tracking issues and structural corrosion.

Balancing cost effectiveness with long life functionality makes this the ideal choice for your application.

-  Proven Performance
-  Quality Product
-  Flexibility in Design
-  On-time Delivery
-  Australian Owned

Application

Installed at the head end or discharge point of any conveyor belt. Suitable for high speed or wide single and bi-directional conveyors.

FEATURES	BENEFITS
Manufactured from high grade stainless steel	= Increases longevity in structural components
Interchangeable with standard cleaner poles	= No requirement to modify existing installations
Robust design	= Allows the duty of the cleaner to be matched to the size and speed of the conveyor = Improves longevity and performance
Available with spring or air tensioning systems that self adjust	= Reduces maintenance costs as no manual adjustment required
