

WATER CONTROL UNIT WITH BYPASS

The range of ConvaTech water control units assists with delivering the benefits of a superior wet cleaning system.

They are designed to control water quality, pressure and enhance cleaning performance of any belt cleaning system. Water spray systems improve cleaner performance by up to 75% over dry systems and the water control manifold plays a huge part in this.

Balancing cost effectiveness with long life functionality makes this the ideal choice for your application.

Application

All wet belt cleaning systems to a maximum pressure of 1380 kPa.

-  Proven Performance
-  Quality Product
-  Flexibility in Design
-  On-time Delivery
-  Australian Owned

FEATURES	BENEFITS
Automatically controls water flow to the spray nozzles	= Minimises water added to product = Reduces maintenance
Supplied with a bypass line	= Allows water control unit to be maintained while conveyor and sprays remain in operation
Contributes to performance enhancement of all conveyor belt cleaning systems	= Improves dry belt cleaning system performance by up to 75% = Prolongs service life of conveyor belt and cleaner tips
Manufactured with a high-grade stainless steel reusable water filtration device	= Prevents build up/blockage of nozzles = Allows cleaning to be completed during routine maintenance
Integrates with existing conveyor drive controls or PLC system	= Ensures spray operation is controlled in-line with client requirements
Available in a range of solenoid types and voltages	= Compatible with site electrical requirements
Designed with an LED indicator on all standard solenoids	= Alerts any power fault problem
Water filters available in 150uM and 560uM	= Minimises spray blockages
Quality assured product	= All panels are inspected and pressure tested following assembly

**Optional enclosed lockable stainless steel cabinet available*
