

TUFFCLAMP SKIRT SYSTEM

The range of ConvaTech skirting systems ensures maximum retention of dust and product within the transfer chute reducing safety hazards and environmental impact around the conveyor.

This is achieved by ensuring that the structural steel of the transfer chute remains clear of the belt, reducing the possibility of belt damage through gouging, while the skirt rubber seals the transfer.

Balancing cost effectiveness with long life functionality makes this the ideal choice for your application.

Application

All conveyor loading areas.

-  Proven Performance
-  Quality Product
-  Flexibility in Design
-  On-time Delivery
-  Australian Owned

| FEATURES | BENEFITS |
|--|--|
| Manufactured from high grade stainless steel | = Increases longevity in structural components |
| Designed and supplied as individual components | = Allows easier access into tight fitting areas = Reduces manual handling hazards |
| Mechanical screw up adjusters | = Positive clamping into the soft skirt rubber to ensure retention |
| Manufactured with acme threaded adjusters | = Prevents seizing |
| Clamps are manufactured with safety pins which interlock with the skirt rail | = Ensures clamps will not vibrate loose, eliminating the possibility of the rail dropping down and damaging the belt |
| Dimpled skirt rail | = Superior clamping force which improves rubber retention |
| Flexibility in positioning of clamps to avoid chute obstructions | = Faster installation = Reduces safety hazards |
| Can accommodate between 10mm and 19mm thick skirt rubber | = A standardised system can be used across your site with varying rubber thicknesses |

**TS Global can also supply a full range of skirting rubber*

| Item Code | Description | Unit | Overall Length (mm) | Weight (kg) |
|-----------|--|------|---------------------|-------------|
| 30-10-001 | Skirting, TuffClamp assembly | Each | 2000 | 11.6 |
| 30-13-001 | Skirting, TuffClamp assembly - low profile | Each | 2000 | 10.0 |
